What the Nordics can teach us about having fun

What do you get if you mix a love of foraging and the countryside with a child-centred mindset and a healthy attitude to danger? Answer: playgrounds that are the envy of the world. “Scandinavia is a special place for children, no doubt,” says Brit Kieran Long, director of ArkDes, Sweden’s national centre for architecture and design, “and Sweden has children at the heart of everything it does”. He puts this, in part, down to “the amazing equality of gender between parents. Parenthood here is not women’s work, it’s much more equal, and there’s huge amounts of parental leave”. That creates an extreme demand for experience, and informs how public play is handled, he adds. But the Scandi philosophy of play, around free – rather than structured – play, and plenty of it outdoors, led to more inspiring settings. It all began when Danish architect Carl Theodor Sørensen came up with the notion of skrammellegepladser or “junk

On the other side of the world, in Japan, Ryūnosuke Akutagawa began 1922 by redefining literature in his own way. In January, his story In a Bamboo Grove was published in the new year issue of literary magazine Shinchō. It's best known now as the main source for Akira Kurosawa's film Rashomon, but the story remains a masterpiece in its own right. Akutagawa's innovation was to blend old and new at a time when Japan was emerging from centuries of isolationism: he retold a 12th-Century folk tale using a fractured narrative, reporting the murder of a man from numerous different viewpoints and witnesses, several of which are mutually contradictory. This has become a popular way of storytelling because
